

The Blairmore Graphic

VOL. 1, NO. 7

BLAIRMORE, ALBERTA, FRIDAY, SEPT. 13, 1946

\$2.00 PER ANNUM

CENTRAL UNITED CHURCH BLAIRMORE

Rev. James McKelvey, Minister

Services Sunday next:

11.00 a.m., Senior school.
2.00 p.m., Junior school.
7.30 p.m., Public Worship.

ST. LUKE'S CHURCH, BLAIRMORE (Anglican)

Rector: Rev. W. Grazer

September 16th, 13th Sunday after Trinity.

7.30 p.m. Harvest thanksgiving.

SALVATION ARMY, COLEMAN

Captain and Mrs. T. Smith, Officers in charge.

Sunday services:

11 a.m., Holiness meeting.
2.30 p.m., Directory class.
3 p.m., Sunday school.
7.30 p.m., Salvation meeting.

Tuesday: 7.30 p.m., Red Shield Auxiliary and Home League.

Thursday: 8 p.m., Praise meeting.

Funerals, dedications and marriages on application to the local officers.

HILLCREST UNITED CHURCH

Services every Sunday at 3 p.m.

BELLEVUE UNITED CHURCH

Services at 7.30 p.m. every Sunday.

Services alternate Sunday mornings at 11 o'clock.

Rev. W. H. IRWIN, Minister.

BELLEVUE BAPTIST CHURCH

Pastor: Rev. Fred Bennett

Sunday school 10 a.m.

Morning worship 11 a.m.

Evening service 7.30 p.m.

Midweek meeting:

Wednesday 7.30 p.m.

A cordial welcome awaits you.

SHORTAGES BY STATUTE

Members of the various parties in the House of Commons recently joined in proposals for prolonging the housing and other shortages.

The way they did it was to urge that the weekly payments for all drawing unemployment insurance be increased.

Every employer of day labor in Canada knows beyond the shadow of doubt that the unemployment insurance is a principal reason that men will not take outdoor jobs in hot weather, cold weather or almost any kind of weather when the beer parlors are open or the fishing is good.

And it is now government policy that a person may earn up to \$2.00 per day at casual work without forfeiting his unemployment insurance income. A thrifty individual likely can do fairly well for quite a while by working just enough not to become too utterly bored.—The Printed Word.

IN MEMORIAM

In Loving Memory of Anthony Pondeuick, senior, who died Sept. 9, 1945.

Gone dear father, gone forever.
How we miss your smiling face.
But you left us to remember.
None on earth can take your place.
A happy home we once enjoyed—
How sweet the memory still.
But death has left a loneliness
The world can never fill.
Ever remembered by his son and family.

DELLA FALLS, B.C. HIGHEST IN WORLD

Ten times as high as Niagara Falls and 1,180 feet higher than the Victoria Falls of Africa, Della Falls of Strathcona Park on Vancouver Island has recently been revealed as the highest waterfall in the world.

Cascading from the rocky plateau above, Della Falls drops 1,580 feet into the Drinwater Creek below to establish the record for the world's highest waterfall, but the volume of water pouring over is not to be compared with the mighty Niagara Falls. However, Della Falls is a falls of no mean volume and as it plunges down the mountainside in a series of long drops it defies the daring few who venture to climb inside the slippery boulder-rock face of the falls.

Della Falls are graceful and beautiful in summer. In spring after a heavy winter snow they are spectacular.

The falls may be reached from the north, by way of Forbes Landing and Battle Lake, but the easiest way to reach these world's highest falls from the Alberni Valley one must first go to the community of Great Central Lake. It is then a 25-mile trip by speedboat or rowboat to the head of the lake and a 13-mile hike along a rough trail which was built for pack horses to serve the now defunct Drinwater copper mine.

If plans of mining companies to develop the potentially rich gold area in the Della Falls-region materialize, a road will be built to the foot of the falls by next year.

Formerly used by miners who climbed to the rocky plateau above the falls to work every day and carried the ore from the Drinwater Mine back down the 1,800-foot descent, a trail winds from the foot of the falls, west of the great falls themselves, and along the left side of two small catenacs which grace the slope near the falls and up to the head of the waterfall. The trail is rugged, but safe enough with the aid of cables and straps that were put in place by the old mining crews.

Source of the falls is Della Lake, which lies in the rock plateau above the falls 4,000 feet above sea-level. The big interior Range with Della Glacier on its slopes faces Della Lake on three sides—Game Trails.

IN WESTERN DOG-HOUSE

For a time, perhaps for all time, George Drew, premier of Ontario, is the most unpopular man west of his own province and, maybe, in the Maritimes. They're predicting that individual provinces will reimpose vexatious and onerous personal and business taxation, because Ontario would not acquiesce in Ottawa ideas.

It shows the power of propaganda. The impression is abroad that Ottawa taxes would be reduced if Ottawa paid the provinces, and that Ottawa taxes could not be reduced if the provinces levied certain taxes of their own. The mere taxpayer, meanwhile, naked and shivering in a corner, is merely waiting to see if the holdup men, after their arguments, will hand him back his britches.—The Printed Word.

RUTTER FROM COAL

A factory that makes butter from coal has been discovered by the British at Witten, Germany. According to the manager, it can produce 600 tons a month and will keep without refrigeration. As proof, he exhibited a pound manufactured before the war which was still fresh and firm despite the fact that it hadn't been on ice.

There is danger ahead when a man throws his tongue into high gear before he gets his brain going.

COWLEY HAPPENINGS

Mrs. Griffith Parry, teacher of the junior room of the village school here, is confined to her home through illness. During her absence, Mrs. Kenneth Martin is acting as substitute teacher.

The recent four day rain has again held up the harvesting, but with continuing sunny days will begin again this week end. This spell of weather passed off without frost, which was feared.

On Tuesday evening, September 9th, a meeting of the AFU members was held, held, largely attended also by the general public, to discuss the strike situation. The matter was thoroughly discussed and a final vote of the 100 of more present was strongly in favor of continuance of strike, but against any violent picketing.

HILLCREST HAPPENINGS

Mrs. J. Curry was hostess to the United Church Women's Association last Thursday evening. This was the first meeting of the season and as there were few members out, it was decided to campaign for new members.

Mr. Jack Hyslop is visiting his parents at the coast for a few weeks. After being closed for the summer months, services at the United church were resumed on Sunday, with Rev. Irwin in the pulpit.

Miss Doreen Schaff, of Medicine Hat, is visiting here with her mother, Mrs. E. Hartford.

Young George Martynak returned last week from a vacation in Edmonton.

Mr. and Mrs. G. E. Cruickshank left on Wednesday by motor for a two week visit in Winnipeg.

The playoff baseball games between Wrentham and Hillcrest, billed for Sunday last, was postponed because of bad weather. Posters are up calling for these games to be played on Sunday at 1:30 and 5 p.m.

Mr. and Mrs. J. Owen, Laura and Leslie, of Coleman, were Sunday visitors with Mr. and Mrs. W. Moser.

Life does not consist in what a man possesses but in what he possesses him.

Habit is a cable. You weave a thread of it every day, and at last you can not break it.

DEMOUNTIEZ-SIMISTER

A quiet but pretty wedding was solemnized at the United church on August 28, when Margaret Elizabeth (Betty), only daughter of Mrs. S. Simister and the late Mr. S. Simister, became the bride of Roger L. Demountiez, youngest son of Mr. F. Demountiez and the late Mrs. Demountiez. Rev. James McKelvey officiated.

The bride, who was given in marriage by her uncle, Mr. Alex. McKay, wore a white jersey afternoon dress and white accessories. She wore a corsage of white tulips with a halo of white baby flowers and a corsage of sweetheart roses.

Mrs. Norman Walker, acting as matron of honor, wore a pink afternoon dress with matching feather hat and a corsage of white carnations. Best man was Marcel Demountiez, brother of the groom.

A reception was held at the home of the bride's grandmother, Mrs. S. McKay. About thirty guests were present and were received by the bride's mother, Mrs. Simister, who chose a dove gray afternoon dress with black and red accessories and wore a corsage of pink carnations.

For going away the bride dressed in a queen's blue dressmaker's suit with matching accessories. The young couple, after a honeymoon spent in Calgary, have taken up residence in Balmora.

SCOUT OFFICIAL DECORATED

Col. John Wilson, director of the international bureau of the Boy Scouts association in London, has been honored by the United States government with the award of the Legion of Merit in recognition of his direction of resistance movements in Denmark and Norway during the war. Col. Wilson was on leave of absence from the Boy Scouts during that time.

Sweet Young Things: "I've been misbehaving and my conscience is bothering me."

Psychiatrist: "Well, I can help you strengthen your will power."

Sweet Young Thing: "Er... could you give me something to weaken my conscience?"

DISTRICT MINERS VOTE FAVOR STRIKE ACTION

Miners of the immediate Pass district voted on Tuesday on the proposal to authorize their policy committee to call a strike if necessary, with the following results:

	Yes	No	Sp.
Blairmore	409	29	1
Bellevue-Hillcrest	580	47	1
Coleman	597	73	1

2,162 RATION BOOKS

DISTRIBUTED HERE

A total of 2,162 of the new No. 6 Ration Book was distributed in Blairmore on Wednesday and Thursday. The kind of volunteer workers were kept busy both days.

The number of books handed out at other Pass points were: Frank 226, Hillcrest 843 and Bellevue 1980. This makes a total of 5,211 for the four points.

Those who failed to call for their books will have to wait till after Sept. 30 before they can secure their new books.

EARLY LABOR MEMBER OF LEGISLATURE DIES

Philip Martin Christopher, 72, pioneer labor member of the Alberta legislature, died at Edmonton on Monday after a long illness. Born in Cornwall, England, Mr. Christopher came to Canada in 1892. For a number of years he was a resident of Blairmore where he was active in the UMWA organization. He was named to the legislature for Rocky Mountain constituency in 1921 and held the seat until 1930 when he joined the provincial government mines department from which he retired eight years ago.

CHIEF SCOUT ON TOUR

Lord Rowallan, Chief Scout of the British Empire and Commonwealth, is now in Canada and started his Dominion-wide tour on Sept. 3 at Ottawa, journeying from coast to coast and including a short visit to the national headquarters of the Boy Scouts of America in New York City. Lord Rowallan is accompanied by A. W. Harill, general secretary of the Boy Scouts Association of Great Britain.

When D. C. Coleman, CMG, chairman and president of the Canadian Pacific Railway, and Mrs. Coleman met Field Marshal Montgomery at the Field Marshal's camp. Col. Coleman, Windsor station, Montreal, before he boarded the special CPR train for Ottawa, the distinguished soldier autographed one of Mrs. Coleman's most prized possessions. It was a picture of their son, Lt.-Col. Rowan C. Coleman, DSO, MC, being decorated with the Military Cross by Montgomery.

met and when transferred to Northwest Europe took over command of the Lincoln and Walland Regiment. Left to right: Mr. and Mrs. Coleman, Brig. W. J. Home, MC, DCM Military District No. 4, Viscount Montgomery and an RCMP constable. (Canadian Army photo by Lieut. Alex. Dore).

BACK TO ALMA MATER FOR MARRIAGE VOWS

A Blairmore girl, Miss Carlotta Mary Fleming, returned to her Alma Mater, Notre Dame College, Wilcox, Saskatchewan, when she exchanged marriage vows with Edward Joseph Blue on August 31. Miss Fleming, a graduate of Notre Dame College, is the daughter of Mrs. D. F. Fleming, Blairmore, and the late Denis Fleming, and the groom is the son of Mr. and Mrs. H. N. Blue, Wilcox. Nuptial mass was solemnized at 10:30 a.m. at St. Augustine's church, Rev. Father Athol Murray celebrating mass and performing the marriage ceremony.

Miss Mae Bittner and John Murphy were bridal attendants, and the bride was escorted to the altar by her brother, Frank Fleming.

The bride wore a floor-length gown of white jersey, with long bridal veil, and carried a white prayer book and cascade bouquet of white gladioli centered with pale pink sweetheart roses.

The bridesmaid's choice was a pastel green jersey gown, with seed pearl trimming, white feather hat and she carried a colonial bouquet of mauve gladioli.

During the mass, the following hymns were sung: "On this day, O Beautiful Mother," sung by Miss Dorothy Moravec; "O, what could my Jesus do more," sung by Miss Dorothy Moravec and Frank Germain; and "Psalms Angelicus" (Cesar Frank) sung by Denis Fleming, brother of the bride.

During the signing of the register, Frank Germain sang Schubert's "Ave Maria."

The wedding mass was played by Miss Maxine Ladouceur, who also accompanied the soloists.

George Clark and Joseph Blue, the groom's brother, were ushers.

After a repast at Lane Hall, Notre Dame College, the bridal party proceeded to Regina where a reception was held at Hotel Saskatchewan at 3:30 p.m. Mrs. H. Martenson poured tea and Mrs. W. Speers presided at the coffee urn. Those serving were Mrs. M. Gendron, Misses Wanda Phillips, Joan Conraughty and Maxine Ladouceur.

The bride's mother wore a gown of grey sheer, with gold trimming, navy accessories, and a corsage of American beauty roses, while the groom's mother chose a gown of brown crepe, with matching accessories, and corsage of yellow roses.

The young couple left by plane on a honeymoon trip, after which they will make their home at Saskatoon, where the groom is attending the University of Saskatchewan.

Prior to her marriage the bride was continuity editor with CKRM broadcasting station at Regina.

A SCOUT TROOP'S RECORD

An unique record of service is that of the Boy Scout troop at Plaster Rock, NB. The Scoutmaster, Tilton Sutton, has been on the job for 21 years. During the war 196 former members of the troop served with the armed forces and of this number 12 gave their lives, seven won the DFC, three the MC, three the MM, one the DFM, and one the Dutch Bronze Star. During the war the troop occupied the Canadian Legion hall, which they furnished at a cost of \$900, turning the furnished hall back to the Legion as soon as the war was over.

Every Man is a Born Collector

First he collects beetles, toads and marbles... Then girls, kisses and fancy ties; then dollars, troubles and a family. Then gold cups, after dinner stories and newspaper clippings about himself... And, lastly, aches, symptoms and memories.

WORLD HAPPENINGS
BRIEFLY TOLD

About 3,500 German prisoners are working on farms in Ontario, Manitoba and Alberta, slightly more than last year.

A London Daily Graphic columnist said that of the 4,000 Canadian servicemen left in Britain some will be there for five or more years.

Canadian fluid milk sales in 1945 reached an all-time high of over four billion pounds, and are expected to increase another 5 to 10 per cent.

The Government of South Africa have appointed a director of food supplies and distribution to organize a cereal ration scheme in urban areas.

The land doesn't seem to have lost its appeal for girls. In the first week of its new recruiting campaign the British Women's Land Army received over 1,400 inquiries.

During the first year of demobilization 3,150,000 demobilization outfits, or 31,500,000 separate items of clothing were issued to men and women leaving the services.

Reconstruction Minister Howe told the commonsense it "is true that the cost of operating aviation facilities in Canada are greatly in excess of the revenue derived therefrom."

Elre is preparing to compete with all comers for the British bacon market. The government has decided to tighten control of the hog industry, supplied by 350,000 farmers.

A new granary costing \$4,500,000, the biggest milling project of its kind in Scotland, is to be built in Renfrew, by a Clyde-side company. It is intended mainly to handle grain from Canada.

A special laboratory is being erected at Sault Ste. Marie, Ont. where disease cultures will be developed to combat such forest insects as spruce budworm and hemlock looper.

Cheap Labor

Surplus Population Of Italy Is Planning To Emigrate

ROME.—Large numbers of Italy's surplus population of 15,000,000 are storming the consulates of the United States, South America and France—hoping to start new lives in more agreeable surroundings.

Their first choice is the United States; second, Argentina or Brazil, and third, France, Belgium or Switzerland. The U.S. quota allows for 5,500 immigrants a year, but there are already 300,000 applications on file with the Italian foreign office.

Of the 750,000 Italians who will emigrate during the next three years, however, only about 400,000 are expected to remain abroad permanently. The remainder—especially those who go to France and Switzerland—probably will stay a few years and come back home.

Approximately 30,000 Italians are expected to emigrate to Brazil. "No more than 25,000 will go to Argentina. A shortage of transport will limit all emigration to South America. Count Seco-Suardo, director of Italian emigration abroad, doesn't believe that emigration is the answer to the current escapist attitude among Italians.

"The best solution for the overpopulation and unemployment problems in the immediate future," he said, "is the investment of United States capital in the Italian basic industries. This would be especially profitable in southern Italy, where labor is cheap.

Seco-Suardo reasons that it is better for one man to get a job in Italy than for five Italians to leave the country. Those who remain probably will support a family or four or five, he said, but those who emigrate often are not able to send money back to their families.

"This problem is not specifically Italian," Seco-Suardo said. "Because the other 45,000,000 Italians are not going to lie down and die. And the manner in which the Paris peace conference solves this problem will determine to a large extent—the future peace of the world."

Seco-Suardo said he believed that treatment of Italian immigrants in other countries would indicate "either good will, indifference or hatred toward the Italian people" as a whole. Emigration, he said, "is a matter of mutual trust."

LATEST DEVELOPMENT

Sending color pictures thousands of miles by radio is the latest development of the wonder of wireless waves. Two four-color pictures have already been transmitted from England to Australia. Soon, no doubt, color photographs of, say, a London procession will be appearing in Australia the following day.

BEFORE DISCOVERY

The Swissman Wachmann comet was photographed 25 years before it was discovered. The comet was discovered in 1927, but a photographic plate made in 1902 was found to show the comet.

If it were not for artificial light our nights would be devoid of colors, relieved only by a contrast of moonlight and shadows.

BODIES OF AIRMEN DOWNED OVER YUGOSLAVIA FLOWN TO U.S.—Military guard stands at attention on either side of transport plane's door as caskets of five airmen are placed on vehicle at Rome before being flown to U.S. Dean Acheson, undersecretary of state, announces U.S. will demand some satisfaction from Yugoslavia for their deaths. Marshal Tito and chiefs of his army have expressed apologies.

Health
LEAGUE OF CANADA
presents
TOPICS OF
VITAL INTEREST
BE SURE OF YOUR WATER
SUPPLY

In many cases, the water supply is a very real problem to the rural population of the prairie provinces. To answer the question, "When is a water supply safe for drinking and domestic use?" two suggestions are offered. The first is to have a sample of the water analyzed by a Provincial Department of Health Laboratory, and the other is to learn how wells and other water supplies receive pollution, and how they can be protected.

However, it is well to remember that while reports on analyses furnish useful information the bacteriological content of water may vary from time to time, and a correct interpretation of the quality can be made only after several samples, taken over a period of time, have been examined. One good analysis does not necessarily mean a safe water at all times.

When water shows contamination it is well to determine the origin of the pollution, and by what channel it reached the supply. This is not difficult when knowledge of probable sources of contamination is available.

Rural water supplies are taken directly from shallow dug wells, and these offer the least resistance of any type to drainage and contaminating matter. It is known that the most common trouble through which pollution may reach a well are (a) the top and sides near the surface, and (b) the underground drainage or water supply feeding the well. The latter is uncommon except where the well is constructed in fissured rocks or where the ground water is close to the surface.

Pollution of shallow dug wells through the tops and sides is by far the most common occurrence. When these are not watertight, rainwater and splashings from the pump about well carry into the well any dirt and germs which have been left on or near the well by animals or from other sources.

These wells can be protected against surface drainage, and the sides for a distance of 10 feet below the surface should be watertight. Care is needed to ensure that no drainage can enter around the pump base or at the manhole at the top.

A temporary method of disinfecting a well consists of emptying the contents of a small package of chloride of lime (about 12 oz.) into a pail, adding a little water and mixing to a paste. Care being taken to break up all the lumps. The pail is then filled with water and the contents stirred. The supernatant, or surface, liquor is then poured into the well and allowed to stand overnight. The well is then pumped out until no taste is present in the water.

Bacteriological samples should be sent for analyses at regular intervals after this treatment has been applied. Should poor analyses continue the well should be reconstructed, a new supply being dug, or each pail of water treated as it is drawn from the well.

This can be accomplished by boiling or chlorination. If the water is brought to the boiling point, even without boiling for any period, the disease organisms will be destroyed. Some Provincial Departments of Health have available for public distribution small chlorine outfits—reasonably priced—which can be used to treat water instead of boiling.

HISTORY REPEATS ITSELF

In the first century the Romans refused to allow an inventor to make use of an apparatus for transporting heavy stone columns because it would throw men out of work.

Friendly Gesture

Many English School Children Corresponding With French Children

A scheme to link English schools with schools in Belgium and to put individual children in the two countries in touch with one another is announced by Britain's Ministry of Education. Its purpose is to improve Anglo-Belgian relations by the exchange of correspondence and by pairing schools of similar interests and background with a view to the interchange of pupils and holiday visits. A similar scheme between France and Britain was started in November last and has created wide interest. Fifteen thousand children in English schools are now corresponding with a similar number of French children and 250 schools in Britain have been directly linked with schools in France.

Limpet Mine

Was Used To Sabotage A British Ship In Palestine Area

JERUSALEM.—The British army announced, after a two-day search of the Sedat Yam area, that it had found a limpet mine such as was used to sabotage the refugee ship Empire Rival.

Specially trained dogs found the mine, similar to one attached to the hull of the Empire Rival, as she was about to pull out for Cyprus with a group of Jewish refugees.

Four thousand troops carried out an intense search of the coastal area around Sedat Yam below Haifa. Their trained dogs found a mine without explosive, together with equipment like that worn by the "frogmen" who attached the mine to the ship.

LIGHTNING STRIKES TWICE

HARRISON, Me.—Melvin Jordan is minus his second barn, because lightning struck twice in the same place. Johnson completed a new barn after wartime priorities had delayed his replacing one destroyed by lightning several years ago. Then the new barn was destroyed.

LIFE'S LIKE THAT

REG'LAR FELLERS—A Point In The Law

Undergo Tests

Plan Is Started For Training Diplomats In England

A new system of training diplomats has been started at the government training centre at Cobham, Surrey. Under it, future ambassadors will be trained in the art of diplomacy, and will be given a three-day test at Soke d'Abernon Manor, which was used during the war by the army for similar purposes. Only a few are passed.

The candidates come as "guests," being greeted by a pleasant hostess who pins on each a number by which he is known during his stay. The staff live in the main house while the visitors are put up in comfortable army huts nearby.

Special observers are in each group, watching the candidates as they undergo tests at their meals or relax in a well-supplied bar. Quizzes are conducted, and all sorts of annoying, petty tasks—including the dismantling and reassembling of a water tank—are imposed.

Patience and tact are two prime factors sought. Of 700 foreign office candidates tested last summer, 15 were passed and 670 rejected. The other 15 were placed on the reserve and may still be called.

VALUABLE CARGO

The British South American Airways Corporation has found it necessary to install safes in its planes. In recent weeks diamonds, emeralds, money and even snakes have been transported along the air lines. So much valuable freight was being carried that specially-designed strong-boxes were made standard equipment on the London-South America run.

OUR COMPLETE SHORT STORY—

ASK AND THOU SHALT RECEIVE

By WILLIAM EDWARDS

Copyright: Wheeler Newspaper Syndicate.

"M. B. Jones," boomed the large man behind the highly polished desk, "but the man I want as my Assistant Sales Manager must be an aggressive individual—a man of action with plenty of fight."

"I know, sir, but—" "Yes, I know what you mean," broke in the big man, "I realize that you have been with us for a good many years, and your work in the outer office has been excellent, but, well—as I say, I want a man with plenty of fight, and you just do not have that quality, I'm sorry."

"Yes sir," breathed Cuthbert Jones, who was a small-statured little man in his late thirties, with a good-natured face to match.

The girl typing in the outer office was watching Cuthbert come out of the manager's office and take his place at the worn desk. She had worked with him for a long time, and had come to know him well—also his faults. She felt sorry for him, now.

"I'm sorry, Cuthbert," she said, as she laid an understanding hand on his shoulder. "I wouldn't take it so hard if I were you."

"Thank you, Miss Simms," Cuthbert sighed. "You see, it wasn't the extra money that went with the job; but I so wanted to be able to go home and tell Belle that I finally amounted to something."

"Well, never you mind," the girl said. "Come and have coffee. Our rest period is in ten minutes."

"I believe I will, my goodness," Cuthbert exclaimed, glancing at his watch. "It is almost three o'clock. I must hurry over to the bank with the day's receipts before they close. I'll have a cup when I return if you will keep it warm for me."

Not waiting for an answer, he slipped into his overcoat and darted swiftly toward the door.

"Going down, Sam?" Cuthbert asked, as the doors of the elevator opened.

"Down it is," replied the operator.

"You look a little worried," observed Sam. "Something go wrong today?"

"Like I told you before, Sam," Cuthbert sighed again, "my life has been nagging me as usual about asking the boss for that job, and this morning she threatened to pack up and leave me."

"By the expression you're wearing, it would appear that you did ask, and were refused," the old man said knowingly.

"That's it, Sam," replied Cuthbert. "Our house is going to be awfully quiet from now on, I guess."

Cuthbert's brain was working overtime as he made his way through the traffic. What was he going to tell Belle? He wondered what train she would leave on the early one of the late one. His stomach clenched at the thought of eating hamburgers and the like at the corner.

These morbid thoughts were interrupted by the lawn clock peeping out the hour of three. He broke into a run at the thought of being late. Thirty years of going to the bank for the same firm and never late once.

Lucky, the doors were still open. Cuthbert sped through the entrance with the speed of a greyhound, at the same time shouting "Hold it," at the top of his voice, fearing that the teller might close the window.

What the timid little man failed to see in his haste, was a busy individual, coat collar turned up, standing in front of the teller's cage. At the sound of Cuthbert's words, the man swung around. Scarcely from nowhere, two men of the bank seized their opportunity to grapple with the fellow.

All the while, Cuthbert stood staring, eyes and mouth wide open. Then with a groan, he sagged to the floor in a dead faint.

He awoke to find himself looking into admiring faces, including, of all people—his boss.

"Cuthbert," boomed the large man, as only he could boom, "you were wonderful. The bank manager phoned me and told me all about it. To think of you being the means of outwitting that robber."

"But really, sir—" Cuthbert started to explain.

"I know, I know," cut in the man, with the machine-gun voice, "you're just being modest—I knew all along that you had the stuff it takes. Tomorrow morning, Jones, you will take over the job of Assistant Sales Manager, but now I'm personally driving you home."

Cuthbert gave up trying to explain the situation to his boss, one just does not have nerve to contradict.

Reaching home, the little man was met at the door by his wife who hardly waited until his hat was off before demanding what he had done about what.

He assured her that he had and that he would start his new duties in the morning.

She threw both arms about the

little man, almost shutting his wind off. "I told you that if you would only ask for the job you would get it."

"Yes, you're so right, dear," Cuthbert said.

The hard way, he thought.

CHEAP ENGINE FUEL

Model Of Rectifier Using New Gas Has Been Tested

Development of an inexpensive method of making use of atomic energy which eventually is expected to power a locomotive from coast-to-coast at a cost of less than one dollar, was announced by the Buffalo Machinery Co.

F. Alden Miller, vice-president, said the company had developed a rectifier which produces a combustible gas from a commercial type of atomic "C" uranium.

He described an experimental model as about 24 inches high, tubular in shape and built of inch-thick high-tensile steel to withstand a pressure of 6,000 pounds per square inch. This had been used to brew a pot of coffee "just as a side show."

Mr. Miller said the device contained a chamber for a six-ounce charge consisting of 1-640 of grain of atomic "C" dispersed into six ounces of inert material (wood ash). Saturated with water, the charge produced a gas for which no name has yet been chosen.

Acknowledging that the present model was high, Mr. Miller said "the best advice we can get indicates that atomic 'C' eventually can be bought for between 50 cents and a dollar, a pound."

"It would take only about one pound to operate a locomotive for four days—long enough to travel from coast-to-coast."

Mr. Miller said the device contained a chamber for a six-ounce charge consisting of 1-640 of grain of atomic "C" dispersed into six ounces of inert material (wood ash). Saturated with water, the charge produced a gas for which no name has yet been chosen.

CHEAP ENGINE FUEL

Model Of Rectifier Using New Gas Has Been Tested

Development of an inexpensive method of making use of atomic energy which eventually is expected to power a locomotive from coast-to-coast at a cost of less than one dollar, was announced by the Buffalo Machinery Co.

F. Alden Miller, vice-president, said the company had developed a rectifier which produces a combustible gas from a commercial type of atomic "C" uranium.

He described an experimental model as about 24 inches high, tubular in shape and built of inch-thick high-tensile steel to withstand a pressure of 6,000 pounds per square inch. This had been used to brew a pot of coffee "just as a side show."

Mr. Miller said the device contained a chamber for a six-ounce charge consisting of 1-640 of grain of atomic "C" dispersed into six ounces of inert material (wood ash). Saturated with water, the charge produced a gas for which no name has yet been chosen.

YOUR PLACE AT

THE PEACE TABLE

Several men with different ideas of life sat down to draw up an agreement. One had gone to Sunday school as a boy, but grew up to believe that God helps those who help themselves. "Is it profitable?" became his standard.

Another, as a boy, had gone to very select schools. He grew up believing in being a gentleman. "Is it cricket?" became his standard.

A third had no boyhood. He grew up all of a sudden in the school of hard knocks and called himself "realistic." He believed that his ends justified any means. Political expediency became his standard.

These three men, naturally, could not agree. They had no common standards.

Something very like this prevails at the Paris peace conference. The nations meeting there have no common ideology. Some have no ideology at all. Their judgment of what is right in international affairs is warped by their ideas of what we live for.

But what can anybody do about it? The ordinary man has no place at the peace table. Or has he? Suppose you decide what you are really living for yourself. Profits? Pride of race or breeding? Gaining your own ends? Or to set up moral order in the world as God intended?

Then run your life, your home, your business and your politics that way. If you make a great success of it, others will follow. Your whole nation very likely will in time adopt your ideology. Other nations will follow suit. Then they can sit down together and agree. And peace will finally be possible.

He who plants thorns should never go barefooted.

Even people who are proud of where they come from don't seem to think where they are going.

She: "Is it dangerous to drive with one hand?"

Her: "You bet. More than one fellow has run into a church doing it."

Offer: "What color bathing suit was she wearing?"

Operator: "I don't know, she had her back turned."

"When learning to skate," advises a rink instructor, "always look upward and not at your feet." Of course if you look upward and still see your feet, you're doing it wrong.

At the zoo, a kangaroo suddenly jumped over the fence and ran away. The keeper ran up and said to a lady standing in front of the cage: "What did you do when you reached your hand in there?"

"Why," she replied, "I just tickled the kangaroo's stomach a little."

"Well," said the keeper, "you better tickle mine a little, then, I've got to catch him."

HOME CONDITIONS SAID 99 PER CENT CAUSE OF CRIME

Toronto, Aug. 28. — "The worst criminals in Canada are between the ages of 16 and 19," according to Lt. Col. Wallace Buntin, head of the Salvation Army prison and police services department. "The next worst age group is from 19 to 25."

"Veterans of service with the armed forces have not been responsible for even the share of crime that could be attributed to them on a percentage of population basis," he said.

It is possible to trace back to the home 99 per cent of the major crime in Canada, Col. Buntin declared. This does not always mean poor homes, because some criminals come from prosperous homes. Too much severity by parents in some cases, not enough in others; deception of children by parents, the bad example of low-principled parents and broken homes are the background factors that develop young criminals, according to Col. Buntin.

"The home is first, the school second and the church third in the proper upbringing of the young," said Col. Buntin. "Home conditions are reflected in school conduct and where school conduct is bad there should be investigation of home conditions. Then, too, there is not enough church work among young children."

The Salvation Army prison department has 92 officers across Canada engaged in full- or part-time reclamation work among prisoners. Last year personal work was done with 29,787 of them and more than 2,000 individuals were handed over to the Salvation Army by courts and prison officials. According to Col. Buntin, 87 per cent of these are now going straight and efforts continue to reclaim others.

MOTHER AND CHILD DOING WELL

In an Ontario township there's a mother, aged fifteen, currently receiving the baby bonus on account of an infant to whom she gave birth not long since. The mother's mother is at the same time receiving the baby bonus on account of her erring daughter.

If the 15-year-old girl had acquired a lawful husband she would have deprived her mother of the \$8.00 per month. A cynic suggests that perhaps the infant's father's mother also may be getting the bonus on his account, but there is a regrettable lack of exact information on that point.

HE SLOWLY WALKED AWAY

When a louder crash than usual swelled up from St. Catherine street one of the loafers in a 10-storey office looked down from his window and noted that the accident was forming a definite pattern in the street below. Two street cars had finally caught a taxi cab, their old enemy. The cab had apparently been running on the tracks, an item that the tramway's lawyer would doubtless find useful. The cab had come too close behind one street car, and another street car had stolen up from the rear and bumped it. They had succeeded in nipping the cab between them, shortening a good six inches off it, for and aft. The taxi driver was already out on the pavement, using the wonderfully expressive French language at the motor-man of the rear street car. From eastward and westward along the street, the humans moved, quickening their steps as they sensed trouble for somebody else. A policeman pushed through the crowd. Everyone was coming towards the street car and the cab, forming a pattern of accident-watching. The loafer in the high window felt sad about all those people caught in the pattern of the accident, playing their predictable and too-obvious parts.

Then he saw one person who was not moving towards the accident, but away from it, breaking the pattern, proving that humans can think for themselves. It was the passenger from the taxi cab, beating his fare.

CORRESPONDENCE

Fernie High School Graduation

What is that I hear? Of course, it's the strange insistent tones of the back-to-school bell. Well, I'm going to be like Dagwood and go in by the back door for a change. In place of dwelling on the start of school, I'm going to talk about graduation. I'm rather out of season, I know, but old man weather gets away with it, so why not?

When girls and boys graduate in Fernie, excitement is the keynote, not only for them, but for every member of their families. And why not? After all these young men and women are passing from youth into a world of responsibility and hard work. Many are leaving home, perhaps for good, others are already working, still others are going forth in search of more and better education. Whatever the case might be, it is indeed an important stepping stone in the road of life for the graduates. It is right to see the interest of the public in the final exercises. This, of course, is due to the fact that the Fernie teachers impress on the people the importance of the occasion.

The auditorium in the school was so crowded that many had to be turned away. There were twenty-nine graduates from grade twelve and fourteen from grade thirteen. The stage was decorated with bouquets of flowers. The air grew tense as the graduates lined up. The girls wore white formal and corsages, and each was escorted by a well-dressed boy. This procession proceeded to the stage to the strains of some very appropriate music.

After the singing of "O Canada," a speech was given by a grade eleven student. Then the song "I'll see you again" was dedicated by a group of school girls. At this point the grads were beginning to look very sad. The chairman of the school board then gave a very impressive speech on track and field sports. He brought to light very effectively that sports are character builders. He then presented medals to the track meet winners, also a happy event was the presentation of the Rotary Cup for excellence in track events.

The next item was the presentation of the Rotary Shield to the house having the most credits for all school activities.

At this point the principal, Mr. Crookes, introduced the president of the student council, who gave a very good speech ending in thanks to all and good wishes for her successor. The new president a boy, ably presented block letters to many of the graduates for points gained in numerous activities throughout the term.

The girl singers then serenaded the grads with "Let the Rest of the World go by." Many of the boys and girls were noticeably moved by this procedure.

Mr. Crookes introduced Rev. Eagles, who was overseas chaplain for several years. The students listened intently with serious countenances, as he pointed out to them the serious conditions facing them in the next few years due to the present precarious position of the world. Rev. Eagles tried to impress on them the fact that Canada's future falls into their hands along with the other graduates throughout our dominion.

The editor of the school paper was then called on to present the graduation rings. These rings are very nice and bought with the funds raised by selling the "Broadcast." I have read many of them and found them interesting and unbelievable smart to say the least. All the drawings are top hand and the poetry and jokes, etc., are really tops in entertainment. The next year's editor was introduced and she also rendered a worthwhile speech.

The exercises now came to a close with the farewell song sung by the girls of grades nine, ten and eleven. Many of the students by now were crying openly even some of the boys.

On asking the graduates how they felt about it all, the answers were as follows: "My feelings can't be expressed." "I don't know." "I'm sorry

it's all over." "I feel like bawling my head off." But when it came to their future the answer was sure and certain. They know where they are going and what they are doing and that this future to them looked very bright.

By this time relatives and friends were congratulating the graduates and most everyone was laughing and crying at the same time. I, too, was bawling along with my graduated niece, shedding tears of happiness for her, tears of regret for my own inadequate schooling and tears of determination for a worthwhile education and graduation for my children.

When boys cry at their graduation it is proof that school has been made interesting as well as educational. Congratulations, Fernie School and staff, may you always be successful and ever a shining example of what even small town schools can be if the proper interest is shown in these young and stalwart youths on whom our country's future depends.

ISA EVANS.

MOTHER KNOWS BEST

James is at present a summer bachelor. He has sent his wife, Isabelle, and the children off to a cottage for the summer, while he stays at his desk in the hot city and takes such innocent recreation as is available to a married man of some years' standing.

He's been taking some credit for his unselfishness, but now he's beginning to wonder whether it is properly appreciated.

A charming young lady reports that she met Isabelle and the children at the summer resort. The children found the young lady fascinating, as do most men, and, hearing that she came from the city, asked whether she knew their father.

"Oh, yes," said the young lady. "I've met James, but I don't know him well."

James' 9-year-old daughter thought for a minute, and then gravely said: "Well, I think there's the way Mum might prefer it."

To those who did not get NEW RATION BOOKS!

It is not possible to issue new Ration books to consumers who apply in person at Local Ration Boards or at Ration Branches.

If you did not secure your new book during official "Distribution Week"—then mail your application card to any Local Ration Board or Ration Branch in your vicinity.

Your application is to be made on the green card, marked RB.191, at the back of your present book No. 5.

Be sure that the card is filled in completely before mailing, and that your name and address are printed.

DELAYED APPLICATIONS will have to be cleared through the main office of the Ration Administration—and your new book will be mailed you as soon as possible.

THE WARTIME PRICES AND TRADE BOARD

THANK YOU

for waiting for delivery of your

NEW GENERAL MOTORS CAR

We are doing our best to see that you get your new car as quickly as possible

We want to thank every one of our customers — and every prospective customer as well — for the friendly patience with which you are awaiting your new General Motors car, whether it be a Chevrolet, Pontiac, Oldsmobile, Buick or Cadillac.

That patience will be more than rewarded when we hand you the keys to one of these great new General Motors cars, for here, in our judgment are automobiles ahead of their time — far and away the best in each of their respective classes.

We know how difficult it is to wait even a day for a car of General Motors exceptionally fine quality; but we believe you will understand that we and General Motors are as eager to deliver cars as purchasers are to obtain them. Unfortunately, the cars produced so far this year are far fewer than we and the factory had counted on. General Motors headquarters at Oshawa sums up the situation thus:

"Even though our rate of production normally exceeds that of any other manufacturer, we have been able to build, up to August 1, only a small percentage of the number of cars we built up to that date in 1941. Our own production, like that of the industry in general, is still far below normal, because of frequent shortages of essential materials and parts. Strike after strike at the plants of our suppliers has seriously impeded our progress toward full production, and the cumulative effect severely hampers both manufacturing and assembly."

While production is restricted, so — in proportion — are shipments of cars to us. As production increases, we are assured of getting our proportionate share of the total number of cars from the factory. But we want you to know that as quickly as these cars are received, we will speed deliveries to our customers.

We thank you, again, for your understanding and patience — confident that when your turn comes to enjoy the brilliant new standards achieved by the new General Motors cars, you will be thankful you waited.

GM-148

Remember — Our CAR SERVICE is your best CAR-SAVER. Keep your present car in good condition until you get delivery of your new General Motors car, by bringing it to us for skilled service now and at regular intervals.

Soil Conservation

SOIL CONSERVATION has been a subject of interest to farmers and agricultural scientists in this country for many years. Members of the groups have long been conscious of the importance of the problems related to soil erosion, but it is doubtful if the population as a whole has realized how serious is the need for prompt and efficient action in this connection. Recent surveys have shown that the acreage of "bad lands", the name applied to areas in which the soil is no longer fertile, is increasing. In 1941 it was found that in the Prairie Provinces alone there were more than four million acres of abandoned farm lands. These lands would have a potential yield of 62,400,000 bushels of wheat each year, an item which would be far from negligible in increasing Canada's contribution to the world's food supply.

Is Common To All Provinces

The subject of soil erosion is dealt with in a recent article published by the Royal Bank of Canada. In this article the writer states that scientists have found that it takes nature about five hundred years to make one inch of good topsoil, "but this precious source of food and living is being washed from beneath our feet, or blown into the air, at terrific rates." The problem is one that is common to every province in Canada, but it has always been especially serious on the Prairies where wind, and the lack of trees in many districts, have kept it always before the people living there. Much has been accomplished under the terms of the Prairie Farm Rehabilitation Act, passed in 1935. This act provides for the reclamation of areas affected by drought and soil drifting and through it, resources of the Dominion and Provincial Departments of Agriculture and all other agencies concerned with this work have been combined in an effort to conserve and rehabilitate farm lands in the West.

Many Thousands Have Benefitted

It is estimated that more than fourteen million acres of land in the Prairie Provinces have benefited from the work carried on under the P.F.R.A. Tree planting in connection with home building, the provision of shelter belts, individual or small water developments, community water projects, strip farming and scientific crop rotation are only a few of the measures which have been adopted by farmers in co-operation with workers under the P.F.R.A., with the object of conserving moisture and preventing soil erosion. Although many thousands of farmers have benefited from these measures, it is clear that sustained and increasing interest in scientific methods of farming, particularly in respect to this question of soil conservation, will be necessary if Western Canada is to remain a great grain-producing land. The writer of the article already referred to, concludes with the observation that: "Soil conservation opens up fresh opportunities like the discovery of a new West. Those who attempt it are transforming nature consciously, according to a plan, not merely taking what nature offers."

How to Combat RHEUMATIC PAIN

Rheumatic pain may often be caused by excess uric acid, a blood impurity that should be extracted by the kidneys. If kidneys fail, and excess uric acid remains, it may cause severe discomfort and pain. Treat rheumatic pain by keeping your kidneys in good condition. Get rid of uric acid with Duda's Kidney Pills. Duda's helps your kidneys get rid of trouble-making poisons and excess acids—helps you feel better. See what Duda's can do for you. 137

Japanese Troops

Reported To Have Thrown Chinese To Starving Police Dogs
Victory-crazed Japanese troops in North China, their helpless Chinese starving police dogs, which tore the victims to shreds, the War Crimes Tribunal heard.

"I saw them bitten to death," said an affidavit taken from Cheng Tung-Kiang, now a war crimes judge in China.

His testimony was introduced by the prosecution to show that the infamous "Rape of Nanking" in 1937 was not the only Japanese victory orgy in China, that it extended into the remotest provinces.

Gains Support

Campaign For Compulsory Pasteurization Has Backing Of Various Organizations

Among national organizations which have presented resolutions through their provincial branches or directly from their national headquarters, to various provincial governments calling for enactment of legislation for compulsory pasteurization of milk were the Canadian Medical Association, the Canadian Nurses' Association, the Chief Constables' Association of Canada, and the Canadian Council for Crippled Children.

These resolutions, sent to all governments except Ontario, were in support of the Health League of Canada's campaign to obtain compulsory pasteurization laws throughout the Dominion. Ontario is the only province at present with such a law.

The resolutions pointed out that while milk is among the finest of all foods, it is, in its raw state, an excellent culture medium and a means for transmission of bacteria and communicable disease to humans. It was stated that pasteurization will destroy the infectious organisms without lessening milk's nutritive value.

English Lavender

A Good Harvest Was Gathered This Year
Lavender—the basis of some of the United Kingdom's most famous perfumes—was gathered this year in the chief growing centre, Norfolk East England. The harvest was exceptionally good and the industry expects to produce a very good quantity of its high quality fragrant oil. The bulk of the season's perfume is scheduled for export to territories where "Old English Lavender" still holds an unrivalled reputation. Perfumery exports from the United Kingdom have shown an exceedingly rapid rise in the last year.

Don't try to dodge lightning. Its strokes travel 22,000,000 miles an hour.

Price Control And Rationing Information

Q—May I get extra rations for meals served to harvest help?

A—If your harvest help is planning on staying for more than two weeks, they will be expected to turn over their ration books to you. However, if they are not going to work at your farm for that length of time, you may apply to the local ration board in your district for their ration. You are entitled to extra rations if you serve twelve meals or more.

Q—When will the three extra sugar-preserves coupons be declared valid?

A—The ration coupons to cover the purchase of the three additional pounds of sugar for this year will be validated in September and December. On September 19 two of the three extra sugar-preserves coupons will become valid. The other one will be declared valid around December fifth.

Q—If a ration book holder does not obtain his new book under the distribution dates, when will he be able to pick it up?

A—Latecomers will not be able to obtain a new book until after September 29. The books will be issued from September 30 until October 15, by a few selected local ration boards. After October 15 only the branches of the ration administration will issue books. All applications received by the local ration boards after October 15, will be sent to the Wartime Prices and Trade Board offices for attention.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your selling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

Warm Floors

Are A Very Important Factor In Home Heating

Warm floors have long been considered by heating engineers as one of the most important factors in keeping the home comfortably heated. Cold feet, they say, will quickly lead to general body discomfort and can be the cause of common colds. Warm floors are especially desirable to a home in which there are children, because the floor is so often the place where they play.

To provide this essential home heating feature for homes located in the country as well as in town, a Canadian manufacturer has placed on the market this fall a new type of oil space heater, that provides warm air circulation at floor level at all times that the heater is in operation. This Coleman Oil Heater is designed to move the heat—and to put the maximum amount of heat into the home by eliminating waste heat up the chimney. The "heat flow" design of the streamlined cabinet of this oil heater permits circulation of an extra large volume of warmed air. It is this circulation or movement of the warmed air plus fast-warm-up, radiant heat, that keeps floors warm and prevents cold corners in a room. This oil heater is also designed to provide a complete circulation of freshly warmed air three to five times an hour.

POLIO WARNING

Protect All Foods From Contacts With Flies

TORONTO—Renewed warnings to "peel or scrub" all raw fruits was given by the Ontario department of health as the first of "six simple precautions" against infantile paralysis. The department stressed the six "common sense precautions":

1. Peel or scrub all (the word "all" was underlined) raw fruit and vegetables in dirty water.
2. Protect all food from flies.
3. Teach your children to avoid crowded beaches and swimming pools and swimming in dirty water.
4. Avoid over-fatigue and if possible have your children rest for two hours each afternoon.
5. Prevent your children from suffering sudden chills or exposing themselves to too much sun.
6. Make your children wash their hands before eating.

The Canadian Press in a previous story erroneously quoted a report issued by the Canadian Medical Association as warning against raw fruit contaminated by virus-bearing flies. The report, actually said the danger lay in raw fruit when unwashed or unpeeled.

This distinction was elaborated by Dr. D. S. Puffer, Ontario's chief medical officer of health, who said peeling or scrubbing was a precaution in all communicable diseases.

"It's not the fruit or vegetable itself that is dangerous," said Dr. Puffer. "It is the contamination which might be placed on the outside by some flying insects and which can be eliminated by peeling or scrubbing."

Salvaging Ships

Drive By British Admiralty Will Save Millions Of Tons

"Frogmen", underwater explorers, are being recruited by Admiralty salvage officials in a big drive to recover as many as possible of the 2,500 British merchant ships sunk during the war.

With the "frogmen" and the help of a French secret submarine camera which records how a ship is lying, how badly damaged it is and how best it can be saved, now being negotiated for the Admiralty, experts believe they will be able to salvage millions of tons of shipping and scores of millions of dollars worth of cargo.

NEW TYPE IRONING CORD

Wrapped up in her work instead of the ironing cord—no wonder this busy housewife appears calm and collected as she glides her iron. The cord, which is molded in spiral form from neoprene synthetic rubber, stretches and retracts without the aid of springs. It cannot snarl or unravel. Only one foot long when retracted, the new type cord can be stretched to a length of six feet.

Whole wheat contains muscle-building proteins, energy-giving carbohydrates, and other vital elements you need. Kellogg's All-Wheat is Canadian whole wheat.

NOW, MORE THAN EVER,

one of
Canada's important foods!

Busy housewives everywhere are on the alert for suggestions that will help them save time and effort. Thousands depend on Kellogg's ready-to-eat cereals not only for breakfast, but for quick snacks anytime! All-Wheat, Pop, Corn Flakes, All-Bran, Rice Krispies, Bran Flakes and Krumbs are all made by Kellogg's, the greatest name in cereals.

SAVE TIME...SAVE FUEL...SAVE FOOD!

IT CAN HAPPEN HERE IN A DREAM

Restless sleepers frequently see themselves under fantastic conditions. The reader says these dreams have these meanings:

You Can See Your Own Back
—Denotes a fortune
You Are Wearing Wings
—Means from friends
You Are Jumping
—Up, down, poverty

How can a man look at his own back and keep his eye to the future too? Better to avoid dreams altogether! They may be the result of caffeine nerves — from drinking tea and coffee.

Drink Postum! It's the beverage with a full-bodied flavor all its own! Caffeine free — it is a wholesome drink that can't harm any one. You make it right in the cup, with boiling water or hot milk. Cost less than a cent a serving. Enjoyable at any hour! The beverage for the whole family!

A Product of General Foods

Need Ships

Turkish Government Plans To Purchase Fleet From Canada

CALCUTTA—The Turkish government plans to purchase a fleet of 21 vessels from Canada and the United States and the war-converted Canadian National Steamships. Prince David and Prince Robert have been inspected and will be given consideration. Sheik Gogen, marine superintendent for the Turkish state shipping lines and port administrator at Istanbul, stated.

Capt. Gogen, who passed through Calgary on route to New York, is one of eight men sent to North America by the Turkish government to purchase or have constructed ships and railroad equipment.

Wholesale Collision

Several Persons Suffered Severe Injuries In California

BERKELEY, Calif. — Twenty-five automobiles piled up in a wholesale collision on the six-lane high-speed east shore highway, and at least seven persons were taken to hospital with serious injuries.

Smoke from the Berkeley city dump, swept downward suddenly by atmospheric conditions, obscured the roadway. Four trucks and 12 automobiles had to be towed away. Nine others were able to creep off under power.

You can take your choice between the two: the man that won't take chances lacks courage, or the man who does lacks sense.

GEMS OF THOUGHT

OVERCOMING

Real glory springs from the silent conquest of ourselves; without that the conqueror is only the first slave.—James Thomson.

It is not so much being exempt from faults, as the having overcome them, that is an advantage to us.—Alexander Pope.

You will find it less easy to uproot faults, than to choke them by gaining virtues.—John Ruskin.

If one lives rightly, every effort to hurt one will only help that one; for God will give the ability to overcome whatever tends to impede progress.—Mary Baker Eddy.

If any speak ill of thee, fly home to thy own conscience and examine thine heart. If thou art guilty, it is a just correction; if not guilty, it is a fair instruction.—George Herbert.

Draw the curtain of night upon injuries; shut them up in the tower of oblivion and let them be as though they never had been.—Francis Bacon.

Coleman OIL HEATERS

Objection By Britain to The Food Proposals

COPENHAGEN.—Britain presented objections to the creation of a world food board after Director-General Sir John Boyd Orr told delegates to the United Nations food and agricultural organization conference that such a plan would "remove some of the causes of war and lead to world unity." Canada favored the board.

Food Minister John Strachey of Britain said that the food board plan, presented formally to the assembly by Sir John Boyd Orr, would not be freed from "certain risks and dangers." The proposals could be "twisted and perverted" to have an opposite effect, he said, and another danger would be to apply the scheme one-sidedly so that "primary producers even without restricting their output might give themselves an unfair advantage against their industrial comrades."

Canada's chief delegate, Agriculture Minister Gardiner, said Canadians were convinced proposals for the board would work. In a 40-minute speech, he recalled the hardships of the '30's among Canadian farmers and the timely restoration of the prairies in wartime which left Canada with three times as much wheat in store when the war ended than she could normally expect to export in a year.

"All that 600,000,000 bushels now has gone where the world needed it," he said.

Earlier, Mr. Gardiner was elected chairman of the conference commission on technical questions.

The United States undersecretary of agriculture, Morris E. Dodd, said the United States "is strongly in favor of the objectives laid down" and recommended the establishment of an F.A.O. commission to work out in detail an international program for stabilization of agricultural prices at fair levels.

The Spirit Of Fascism Said To Be Still Alive

PARIS.—Yugoslavia ripped into the four-power decision to internationalize Trieste, and urged that the disputed port be awarded to her and bitterly attacked Italian arguments in the dispute as evidence that "the aggressive spirit of Fascism still was alive."

The attack was launched in the Italian political and territorial commission, one of six peace-conference commissions which convened on problems of the peace.

The military commission approved unanimously four-power recommendations that the Italian army, navy and air force be limited to a total of 287,000 men—only a fraction of wartime strength.

The Balkan economic commission adopted unanimously a Polish amendment which would oblige Romania to restore "all the legal rights and interests in Romania of the United Nations and their nationals as they existed" Sept. 1, 1939, the date Hitler sent troops into Poland instead of the day Russia entered the war as the foreign ministers had drafted the paragraph.

On the Romanian political and territorial commission, Britain made a move to put the question of Jewish minorities on the agenda by submitting a representation recently made by a number of Jewish organizations headed by the world Jewish congress. It called for the writing of special guarantees of rights for Jews into all treaties with former satellites. It was presented by Gladwyn Jebb, British foreign office attaché, but there was neither action nor discussion.

Yugoslavia's attack on the four-power decision to internationalize Trieste was made by Dr. Ales Belier, undersecretary for foreign affairs.

He criticized as "absurd and impractical" the French-proposed boundary which the Big Four foreign ministers council adopted in July to divide disputed Venezia Giulia in carrying out internationalization of Trieste.

WILL HELP GREATLY

Shipment Of Phosphates To New Zealand Are Being Resumed

AUCKLAND, N.Z.—New Zealand's production of dairy products will be greatly assisted by the resumption of phosphate shipments from Nauru and Ocean Islands, two rich phosphate islands near the Equator, which were captured by the Japanese during their advance in the Pacific.

From the enormous deposits of finest grade phosphates on the two islands about 1,250,000 tons were shipped every year before the war. Farming economy in both Australia and New Zealand rested very largely on extensive use of this phosphate as fertilizer to keep the pastures in good condition and permit heavier crops of stock.

CANADIAN HONORED

Old Norwegian Military Order Conferred On Lt.-Cmdr. Boak

OTTAWA.—One of the oldest military orders in the world has been conferred on Lt.-Cmdr. E. E. Boak, D.S.C., of Victoria, navigating officer aboard the 18,000-ton aircraft carrier Warrior.

The order, received for services in Norwegian waters while he was commanding the destroyer H.M.C.S. Sioux, is knight of the First Class of the Royal Order of St. Olav—dating back to the 13th century.

The operation which earned the award took place in March, 1945, when Sioux and three other destroyers were ordered to the Island of Sørøy in the mouth of the Allenfjord to evacuate inhabitants who were under shell-fire from the Germans.

Despite the fact that approaches to the island were dominated by a large German naval base at Hammerfest, the destroyers carried out the operation successfully and brought off 300 inhabitants whom they later landed at the approach to Murnank.

IS FACING TRIAL

Jap Will Be Charged With Atrocities Against British Prisoners

HONG KONG.—The story of Japanese ill-treatment of Canadian prisoners of war aboard the transport Oyama Maru on her trip from Hong Kong to Japan in March, 1942, and during their subsequent detention in Japan, is expected to be heard at the trial of Nitori Mori Genichiro.

Nitori, an interpreter, is facing charges of atrocities against British prisoners at a current trial. The British prisoners were on the Oyama Maru which was torpedoed with 1,818 prisoners of war aboard on a journey from Hong Kong to Japan.

"When the Canadians' case against Nitori comes up, he will be charged with the beating of a member of the Royal Canadian Rifles of Quebec."

Other charges allege that Nitori beat four Winnipeg Grenadiers—a Sgt. Payne, a Lt. Col. Berzonski, and Ptes. Adams and Ellis—after their escape from a prisoner-of-war camp on Hong Kong.

HAS NEW NAME

Acropolis Hill Now Known As Franklin D. Roosevelt Park

PRINCE RUPERT, B.C.—Acropolis Hill, where United States army forces were stationed during the Second Great War, was on Labor Day renamed Franklin D. Roosevelt park in memory of the late president.

The dedication of a cairn at the park was attended by Canadian and United States government officials, and civil and provincial representatives.

General David Hays of San Francisco represented the United States, and in the harbor on a courtesy visit was the American cruiser U.S.S. Tucson.

HAVE ONE AIM

MACKINAC ISLAND, Mich.—S. S. Lo, for eight years Generalissimo Chiang Kai-Shek's private secretary, told a Labor day conference of the moral re-armament assembly that the Chinese national constitutional convention scheduled for November aims to end the one party rule of China and begin the stage of constitutional democracy.

IN GREAT DEMAND
SYDNEY, Australia.—Motorists stormed shops, stores, garages and even manufacturers for automobile tires after the ending of five years of wartime rationing in Australia. "One company termed the demand 'colossal'."

Would Free Mankind From Fear Of Hunger

COPENHAGEN.—Delegates and observers representing 31 countries met here to tackle a monumental fight against world hunger, and learned that world supplies of bread grains had improved considerably.

The delegates to the second conference of the United Nations food and agricultural organization heard a report that favorable weather in some areas between May and August had improved the bread grain supply for 1946-47 to such an extent that the formerly indicated gap of from 10,000,000 to 11,000,000 tons between needs and probably supplies had been narrowed to about 5,000,000 tons.

The improvement in supply, however, is contingent upon continuation of the present controls over flour and grains and over the feeding of grain to livestock, the report said.

Sir John Boyd Orr, director-general of F.A.O., told the 700 delegates in his opening address that they could do much to free mankind from the fear of famine and that proposals made at this conference would be fundamental steps in the world battle against starvation.

Before the session opened Sir John presented a plan for the establishment of a world food board to control distribution, and the standing committee on marketing and economics has endorsed it.

The F.A.O. standing committee on economics and marketing in an analysis of the food board plan, said its success depended upon establishment of a system of two prices for farm products in world commerce, and encouragement of industrial development throughout the world with the assistance of international loans.

NEW SOVIET LONDON ENVOY

Agence France-Presse, quoting peace conference sources, says the Russian government has submitted to Britain the name of Georgy Zaroubin, former Russian minister to Canada, as new Soviet ambassador to London. Zaroubin would replace Fedor Gusev, who has been named a deputy foreign minister. Zaroubin served as ambassador to Canada at the time the Soviet spy ring disclosures. The commission on espionage found no evidence Zaroubin was implicated.

TORONTO VIOLINIST

VANCOUVER.—Harry Adkin, Toronto violinist and former member of the Hart House String Quartet, has been appointed to the chair of music at the University of British Columbia. Mr. Adkin is widely known throughout Canada as a concert violinist, music commentator and teacher.

MANY GIFT PARCELS

BERLIN.—More than 800,000 private gift relief parcels arrived from the United States for German civilians in the American occupation zone during August, the American military government disclosed.

FOR SERVICEMEN

Resolution Is Urged At A Convention Of Veterans

EDMONTON.—Amnesty and honorable discharge for servicemen serving imprisonment for fraternization with former enemies was urged by the Dominion convention of the Army, Navy, and Air Force Veterans Association.

A resolution submitted by the Ontario command charged that fraternization was not as serious an offense as desertion, yet sentences imposed were more drastic.

Another resolution endorsed by the convention strongly criticized the government's vocational training program. Submitted by the South Vancouver Unit 26, it urged that the present training program be replaced by an apprenticeship plan under which the government and employer would jointly meet expenses of training on a sliding scale.

Under the sliding scale the government would pay 80 per cent, or the cost of wages and the employer 10 per cent, this to be adjusted as the veteran attained skill. In the final year of apprenticeship the employer would be paying 80 per cent and the government 10 per cent.

LEFT A MESSAGE

Pilot Forced Down Used Timber To Guide His Rescue

EDMONTON.—A message laid out on the ground with dead timber told a rescue pilot that James Hawkins, Seattle civilian pilot forced down in the bush country 60 miles north of Edmonton, had struck out on foot through the wilderness for civilization.

Hawkins had been living with a trapper near the spot where he was forced down on a flight from Prince George, British Columbia, to Grande Prairie and it was believed the trapper had gone with him as a guide. Hawkins' message, clearly discernible from the air, simply said "have left for Edson."

Cash Income For Farmers Shows Decline

OTTAWA.—Cash income received by Canadian farmers from the sale of their products during the first six months of this year totalled \$831,800,000 against \$724,600,000 in the corresponding period of 1945, the Dominion bureau of statistics reported.

The decline this year continues the decrease recorded in 1945 from the record year 1944, when the cash income received from January to June was \$765,100,000.

The bureau said the lower cash income was "almost entirely" the result of small marketings, particularly in the prairie provinces, of wheat, oats, barley and hogs.

Reduced marketings of these products caused decreases in income of \$50,000,000 in Saskatchewan, \$33,000,000 in Alberta and \$7,000,000 in Manitoba. A decrease of about \$10,000,000 occurred in Ontario mainly as the result of smaller returns from meat animals.

The bureau added that with more favorable crops in the west this year and a higher initial price for wheat, together with indications for good crops in other provinces, it was probable that income in the last six months of 1946 would be higher than in the same period of 1945 and that the cash income of Canadian farmers consequently would be maintained near the level of 1945.

Estimates of cash income for the half-year by provinces, with figures for the corresponding period of 1945 in brackets, include: Manitoba, \$51,080,000 (\$58,457,000); Saskatchewan, \$111,708,000 (\$162,191,000); Alberta, \$97,509,000 (\$130,854,000).

NEW MEMBERS

Four Additional Countries Have Been Admitted To Food Organization

COPENHAGEN, Denmark.—Italy, Switzerland, Portugal and Eire were elected to membership in the United Nations Food and Agricultural Organization, grappling here with the fight against hunger throughout the world. Canada already is a key member of the F.A.O.

Italy and Switzerland joined the 51 original members by unanimous vote. Polish Vice-Premier S. Mikolajczyk objected to Portugal and Eire because they had no diplomatic relations with Warsaw.

The organization heard reports that the diet of many persons would be 1,500 calories daily or lower during the next year, a level which many nutritionists believe inimical to health.

MEALS FOR WORKMEN

NEW DELHI.—A meal for only one anna (two cents) consisting of chapatti (wheat cakes) dal (pulses) and iced water, will be one of the amenities provided for workmen of the N.W. Railway mechanical workshops, Lahore, at cooked food canteens which were opened by the railway administration recently.

GREET CHIEF SCOUT

OTTAWA.—Lord Rowallan, chief scout of the British empire, was given a hearty welcome at Lansdowne Park by some 400 Ottawa district scouts.

Brazil has a population of only 442,000,000, but is estimated to have ample room for 800,000,000.

PEACE DELEGATES SHAKE HANDS AFTER HEATED ARGUMENT — Russia's Andrei Gromyko shakes hands with Britain's Sir Alexander Cadogan before United Nations security council session, in which they tangled with verbal heat over hearing Ukrainian charges against Greece. Council adjourned without decision.

Field Marshal Montgomery's Mother And Farm Home

Lady Montgomery, 84-year-old mother of Field Marshal Montgomery, is seen here driving near her Irish home.

Old home and farm of Monty's in New Park, County Donegal. Lady Montgomery ran the farm with the help of a maid and a hired man. Monty's father was a blahop.

A loose tongue may get itself into a tight place.

Miss Helen Pilfold is spending a few days with her parents, Mr. and Mrs. J. Pilfold.

Mrs. Wilbur Vaughn left on Thursday afternoon for her home in Wolfville, Nova Scotia.

Mrs. H. Boulton and Mrs. T. Flynn, of Coleman, were Blaimore victors during the week.

Mr. C. Murphy, of the Royal Bank in Foremost, has been transferred to the Blaimore branch.

The list of prize winners at the recent Bellevue flower show has been unavoidably carried over to next week.

Mr. Frank Swann, of the department of municipal affairs, Calgary, was a business visitor to the Pass this week.

Mrs. C. B. Barrell and Mrs. Sergeant, both of Calgary, spent the week end here with their sister, Mrs. R. Howe.

Mrs. S. Simister spent a few days at Trail with her brother, Thomas McKay, and family, returning this week.

Rene Albert Diamond, son of Mr. and Mrs. F. Diamond, of Blaimore, was awarded a McLean bursary, University of Alberta.

Mr. and Mrs. J. Boorman left today for Edmonton to attend the marriage of their son, Rev. Arthur Boorman and Miss Margaret Robertson.

Mrs. C. Ottwell is spending a week at Blaimore, guest of her son-in-law and daughter, Mr. and Mrs. Malcolm Blako—Vulcan Advocate.

Mrs. J. W. Howe and Lucille, of Calgary, visited with her mother-in-law, Mrs. R. Howe recently, and with her sister in Pincher Creek.

John Chamberlain and John Lach left this week for Calgary, where the former enters the employ of Temple-Duff drug store and the latter the Dunford drug store.

Dependents of servicemen who docked at Halifax on Sept. 4th and have arrived in the district include Mrs. R. McPherson, for Coleman; Mrs. D. Fozzie, Bellevue, and Mrs. O. E. Wende, Cowley.

Frank and Dennis Fleming, sons of Mrs. D. F. Fleming, have left to resume their studies. Frank going to Dalhousie University, Halifax, to study law and Dennis to St. Joseph's Seminary, Edmonton.

Mrs. D. A. Howe returned this morning from a holiday in Vancouver and vicinity, accompanied by her daughter, Mrs. I. E. Anderson (Thelma) who will spend a few weeks with her parents here.

Mr. F. J. Lote, National Employment Service manager, has left for Toronto and Niagara Falls to attend a national convention of the Civil Service of Canada, which convenes September 16th.

Mrs. Walter J. Howe and daughter Alice, of Washington, D.C., spent a few days with her mother-in-law, Mrs. R. Howe, last week and went on to Victoria, B.C. where Walter is at present in hospital. They expect to make their home in Victoria.

Mrs. R. R. Large, of Fern's, is a patient in General Hospital, Vancouver, having undergone an operation on Monday and reported progressing favorably. Little Wendy Large is staying with her grandparents, Mr. and Mrs. W. H. Chappell.

Maj. Gen. F. F. Worthington, DDC, Western Command, will visit Blaimore on Monday, Sept. 23rd, in connection with the 22nd Armoured Brigade Workshop, and it is hoped to arrange a meeting with the Pass Committee.

Government of the Province of Alberta
DEPARTMENT OF MUNICIPAL AFFAIRS
Public Sale of Lands

Notice is hereby given, that under the provisions of The Tax Recovery Act (Chapter 161, R.S.A., 1942), the following lands will be offered for sale by public auction, to be held in the Court Room, at Blaimore, Alberta, on Thursday, the 26th day of September, 1946, at 2 o'clock in the afternoon.

More Tourists mean more dollars for her...

but... CANADA'S TOURIST BUSINESS is YOUR business too!

THE MONEY spent by American tourists—more than one hundred and sixty million dollars last year—spreads around. It means extra income for every Canadian.

It is to every Canadian's interest to protect this business, to treat our visitors with every courtesy, make them want to come again and again. We will thus be building goodwill and building for the future of this great Canadian industry.

Give them a friendly CANADIAN welcome

CANADIAN TRAVEL BUREAU
Department of Trade & Commerce, Ottawa.

"What the world needs is more good neighbours."

"Yes, Frank, there's a whole tangle of troubles to be straightened out all over the world. Makes your head swim to think of it."

"And yet, Jim, most of it springs from one cause... suspicion. You and I wouldn't be very good neighbours if we suspected each other of all sorts of skullduggery. Actually, what the world needs is more good neighbours."

"Yes, the life insurance business is a good example. British life insurance companies have had offices in Canada since 1833 and several of our Canadian companies are well known throughout the United Kingdom."

"What about American companies?"

"We found it good business to be good neighbours with the American life insurance companies. We welcome them here. They carry almost one-third of all the life insurance in force in Canada. And our Canadian companies are well liked in the U.S.A. where they do a large and increasing business. As a matter of fact, they are well and favourably known throughout the world. Nearly half the business of the Canadian companies is outside Canada."

Life insurance is truly an international business—a neighbourly business. At home Canadians buy their life insurance as they choose from British or United States or Canadian companies. And our Canadian life insurance companies abroad! Who can assess the value in Canada of the confidence in the Dominion which they have built up over the years in their dealings with tens of thousands of foreign clients and of their services in establishing Canada's reputation for financial integrity and security throughout the world?

A message from the Life Insurance Companies in Canada and their agents.
